Summary

Full Stack Web Developer with an extensive background as a Financial Analyst. Passionate about problem solving, learning new things, and coding. Detail oriented with good time management skills. Effective in a team environment while developing new programs.

Technical Skills

Languages: HTML, JavaScript, CSS, Bootstrap, SQL, MongoDB, REACT, jQuery, MERN

Applications: Visual Studio Code, GitHub, Excel, Word, PowerPoint

Technical Projects

[SpaceVacation](#) | [GitHub](#) | **Role: Back End and Front End**

This project was built to be used as a fun way to get students and others excited about space travel. It allows the user to pick a planet and rocket and returns facts about that planet while giving a very basic duration for the trip.

- Tech used: HTML, CSS, JavaScript, JQuery, APIs.

[Fantasy Football Advisor](#) | [GitHub](#) | **Role: Back End**

This project was built to help newcomers to Fantasy Football with their draft. It shows them the top five available players at their positions and allows them to either draft the player or to enter the player as drafted by another team. It also shows their drafted team during the process.

- Tech used: HTML, JavaScript, Express, SQL database, Sequelize

[React Google Book Search](#) | [GitHub](#) | **Role: Built Entire App**

This project was a full MERN stack application. It allows users to search for a book using the Google Books API. Once the books are listed the user can then go to the book on google via the link or save the book. Users can view their saved books and also delete those saved books.

- Tech used: HTML, Bootstrap, CSS, JavaScript, MongoDB, Mongoose, Express

Management Experience

- Field Training Officer - Trained and supervised team when sergeant was away from the building
- Continuing Review Specialist - Managed Continuing Review Team
- Team Lead - Supervised IRB Team

Analytical Experience

- Developed new budgeting processes that improved budgeting process and saved time during process
- Created new reports and reporting processes.
- Worked with different departments (domestic and internationally) on budgeting and forecasting.
- Developed multiple excel budget templates and reports for financial analysis.
